Module: Linear Equations   Name:
Lesson 3: x and y intercepts   Date:
Homework   Pd:

Give the x -intercept and y -intercept of the following.

1. 4x − y = 16   2. 2x + 3y = 8   3. y = 2x + 7

4. 3x = y - 1   5. $y = \dfrac{3}{4}x - 7$ 6. 3y = 18

7. 3y = 2x - 9   8. 5x + 4y = 10   9. $4x - \dfrac{1}{3}y = -2$

10. y − 6x = 5   12. 4y − x = 3   13. 4x + 7y = 8
